

CASE: KPMG Copenhagen

Area: Copenhagen, Denmark

Products used: Acoustic Tiles, Acoustic Panels

Architect: Francisco Sarria

On moving to their new offices nestled in the newly renovated Nordhaven district in Copenhagen, KPMG wanted to create a space that represented their Nordic business values. Lead designer Francisco Sarria, took his inspiration from the dockside location. The idea was to bring the location indoors. Large-scale BAUX designs fill the reception and waiting areas with visions of sea and sky. It's here that visitors get their first taste of the relaxed Nordic style of business.

The geometric BAUX shapes meant many possibilities for graphic expression. Everything points up and to the right – forwards, towards innovation. Two twenty-meter tall BAUX designs give the feeling of being outside, in the harbour on a summer's day. Wood fibre textures and natural sound absorption has helped to make these areas calm spaces – perfect for lunch or light conversation before a meeting.

Products used:

Acoustic wood-wool Tiles — Triangle, Square, Parallelogram.

Acoustic wood-wool Panels — Quilted.
